

# User guide for web client

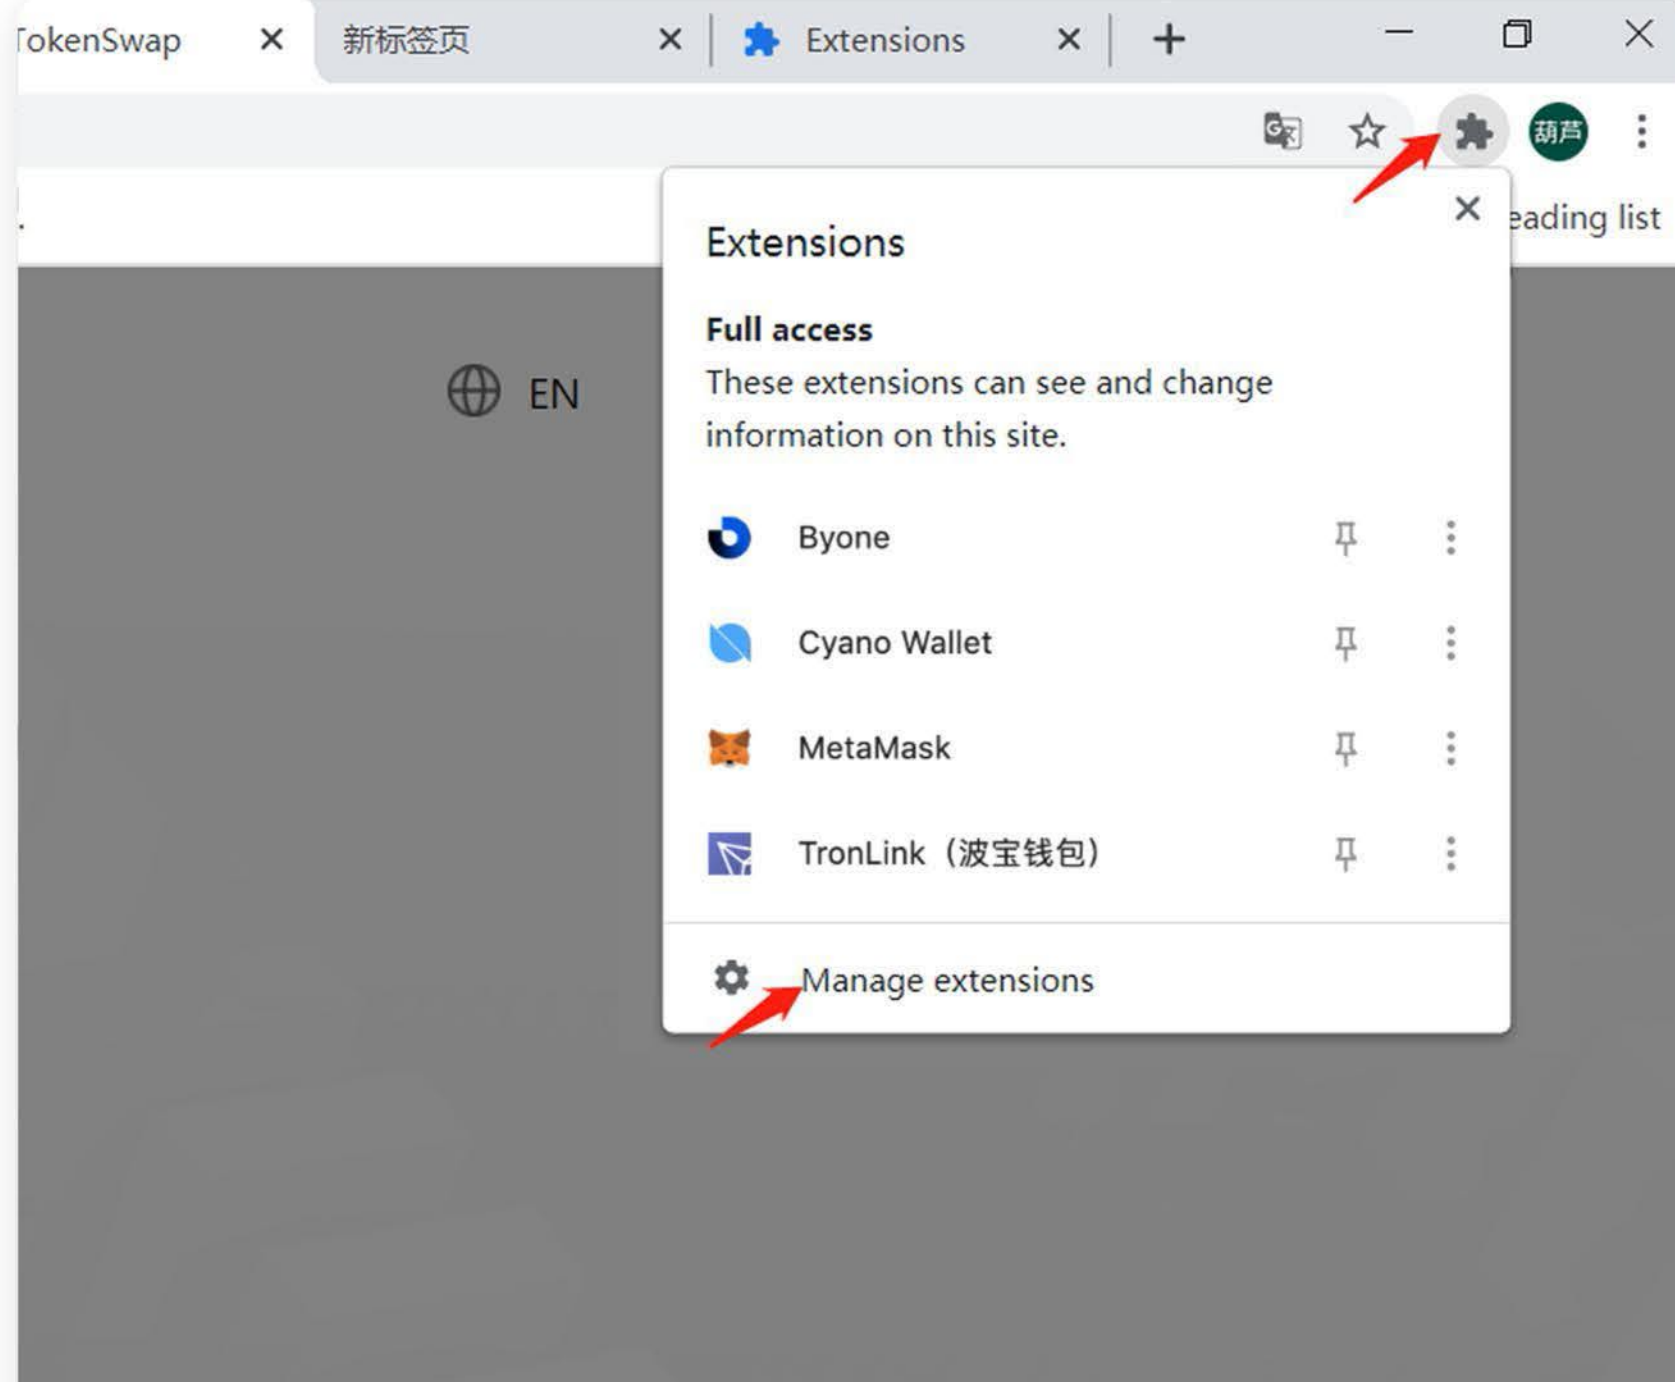

(1) Using Google Chrome, follow the prompts to install XWC Wallet.

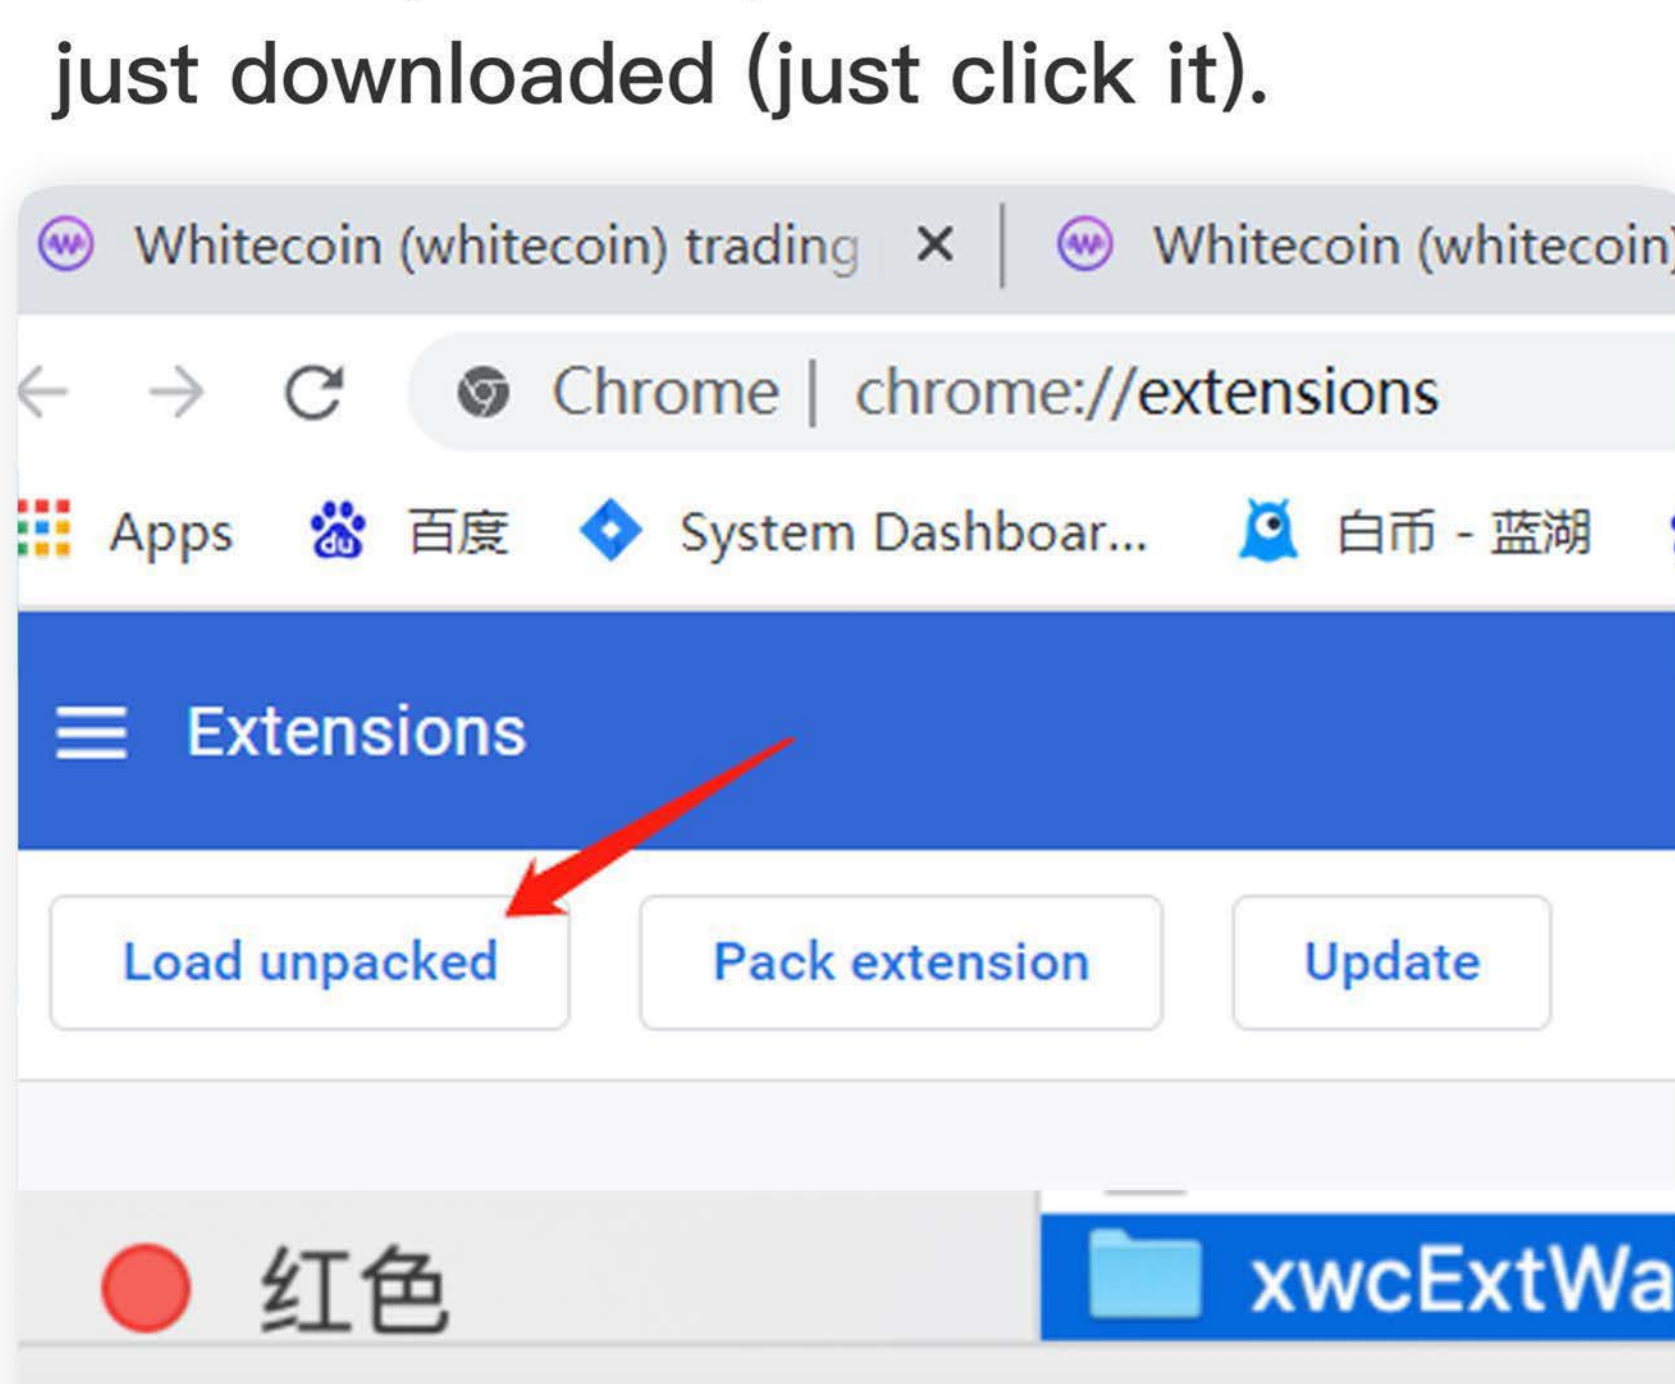

(2) Download the document as shown in the picture.

(3) Click the location as shown in the picture, and click “Extensions”.

(4) Open the developer mode, then click “load unpacked”, and select the file just downloaded (just click it).

(5) Return to the swap page, and you will be prompted to create a wallet. Click where the arrow points, and select the plugin of XWC Wallet to create a wallet. Finally, return the page to use.
